Warm network CRM

These lanes find and work their own contacts. They don't pull from the Hunter queues. Radar keeps past clients, trades and referral sources warm and sends from Rob's own address.

CONTROL LAYER · READS THE DAILY SESSION REPORT, NEVER THE CRMS

- **Tech Support — AM** — Mon–Fri 6:30a
- **Tech Support — Midday** — Mon–Fri 1:00p
- **Tech Support — PM** — Sun–Fri 8:30p
- **Deliverability Inspector** — Mon–Fri 7:30p

- **The Auditor** — Sun–Fri 9:00p
- **The Consolidator** — Sun–Fri 10:00p
- **Rob** — one email per night

AM is a 10-minute infrastructure check. Midday scores the morning while the day can still be fixed. PM scores the full day and writes the action list. The Consolidator compiles every agent's report into one nightly email.

WEEKLY / STRATEGIC

- **The Situation Room** — Sun 6:30p · only agent that may edit protocols
- **Fleet Pipeline Dashboard** — Mon 6:00a · weekly funnel
- **Weekly To-Do Report** — Sun 8:00p

The Situation Room reviews the whole fleet and is the only agent authorized to change how any other agent behaves. Every edit it makes is labeled and reversible.

Legend: each box is a scheduled agent with the days and time it runs · blue pills are the queues, CRMs and ledgers that handoffs travel through · NEW built since the September 21, 2026 map (14 of them) · RUN-OFF answers replies and due follow-ups only, no new first touches
